### [OLEDp1-16L]Lifetime Improvement of Organic Light-Emitting Diodes Using Cyclo-Olefin Polymer Film as Passivation for Flexible Display

\*Ki-Su Kim<sup>1</sup>, Byung-Min Park<sup>1</sup>, Kwan-Young Han<sup>1</sup> (1. Dankook University (Korea))

Keywords:Organic Light-Emitting Diodes, Lifetime, Cyclo-Olefin Polymer, Passivation, Encapsulation

In this study, we have optimized the passivation method of COP film to improve the lifetime and reliability of OLED devices. COP film is suitable as a passivation for flexible displays because of its excellent optical properties, flexibility and gas barrier property. These advantages can replace conventional passivation methods.
