## [OLEDp1-4]OLED Display Device Fabricated by Inkjet Printing Process

\*Ye Yun<sup>1</sup>, Liu Xin<sup>1</sup>, Tang Qian<sup>1</sup>, Guo Tai Liang<sup>1</sup>, Cao Xiang Hong<sup>1</sup>, Yu Yong Shen<sup>1</sup> (1. Fuzhou University (China))

Keywords:inkjet printing, OLED, pixel

In this work,a multilayer OLED device is fabricated by inkjet printing process. Optimized bank structure is used to improve the sub-pixel uniformity.By adjusting the process parameters such as plasma processing time and vacuum dry speed,the quality of the film fabricated by inkjet printing is improved.
