

APAMI2020 Workshop | APAMI 2020 | Workshop

BMJ HCI Journal

Mon. Nov 23, 2020 1:00 PM - 2:30 PM Room E-1 (Congress center 5F - Conference Room 52)

[AP3-E1-3-01] Publish or Perish: Introducing the New BMJ Journal for Informatics

*Yu-Chuan (Jack) Li^{1,2}, *Siaw-Teng Liaw^{3,4}, *Usman Iqbal¹ (1. College of Medical Science and Technology, Taipei Medical University, Taiwan, 2. Graduate Institute of Biomedical Informatics, Taipei Medical University, Taiwan, 3. School of Public Health and Community Medicine, UNSW, Australia, 4. WHO Collaborating Centre for eHealth, UNSW, Australia)

Keywords: BMJ Health and Care Informatics, Paper Writing and Publishing, Interdisciplinary Knowledge

The goal of this session is to help potential authors to publish high quality research in the field of health and medical informatics. To achieve this goal necessitates the development of rigorous well planned, executed and disseminated studies.

This session is an opportunity to review the principles and approach to conducting high quality research studies, and the publication of their findings, in high quality journals. It will also highlight new knowledge from recent outstanding paper published in BMJ Health and Care Informatics. By the end of the session, participants will have learned about a range of matters, including how to improve their scientific writing, the scope and types of content of BMJ Health and Care Informatics (BMJ HCI), and how finally to promote their research.

The editor in chief and deputy editors will be sharing their experience. It will provide a great feedback to participants in their endeavor to publish in high quality journals such as BMJ HCI.

Publish or Perish: Introducing the New BMJ Journal for Informatics

The goal of this session is to help potential authors to publish high quality research in the field of health and medical informatics. To achieve this goal necessitates the development of rigorous well planned, executed and disseminated studies.

This session is an opportunity to review the principles and approach to conducting high quality research studies, and the publication of their findings, in high quality journals. It will also highlight new knowledge from recent outstanding paper published in *BMJ Health and Care Informatics*. By the end of the session, participants will have learned about a range of matters, including how to improve their scientific writing, the scope and types of content of *BMJ Health and Care Informatics (BMJ HCI)*, and how finally to promote their research.

The editor in chief and deputy editors will be sharing their experience. It will provide a great feedback to participants in their endeavor to publish in high quality journals such as *BMJ HCI*.

Expected audience

The session is truly interdisciplinary. We welcome audience participation from healthcare professionals, junior researchers, post-graduate students, and academic staff who conduct research and wish to publish in a high-quality journal. In this session, participants will be taught the importance of paper writing and publishing, types of scientific writing, the structure of a scientific paper, and introduced to a high-quality journal such as *BMJ Health and Care Informatics*.

Panelists

Yu-Chuan (Jack) Li: Editor in Chief of *BMJ Health and Care Informatics*: Professor Li has been a pioneer of Medical Informatics research and a board-certified dermatologist in Taiwan. He is the founder of the Graduate Institute of Medical Informatics in Taipei Medical University. He has been the Principle Investigators of many national projects in Electronic Health Record, Patient Safety Informatics and Medical e-learning. He is also author of 140 scientific papers and 3 college-level textbooks. Currently, he is the Dean of College of Medical Science and Technology in Taipei Medical University, and a Distinguished Professor of the Graduate Institute of Biomedical Informatics.

Siaw-Teng Liaw: Deputy Editor of *BMJ Health and Care Informatics*: Professor Liaw is a clinician researcher with expertise and experience in clinical and health informatics and systems research. He trains medical students and General Practice Registrars at the UNSW Sydney and SW Sydney Local Health District General Practice Unit. He co-founded the WHO Collaborating Centre (eHealth) and Yunus Social Business Health Hub at UNSW. He is a Foundation Fellow and Past President (2005-7) of the Australasian College of Health Informatics, Fellow of the American College of Medical Informatics. He was recently elected to the inaugural class of 100 of the International Academy of Health Sciences Informatics.

Usman Iqbal: Deputy Editor of *BMJ Health and Care Informatics*: Dr Usman Iqbal (Doctor of Pharmacy, MBA Healthcare Management, Graduate Certificate in Health Information Technology and PhD Health Informatics) is working as an Assistant Professor and Digital Health Consultant at Taipei Medical University. He is a focused and goal-oriented Digital Health professional with excellent networking skills, having garnered extensive experience collaborating with diverse national and international stakeholders and leading innovative approaches using Health Information Technology to improve the Quality of Care, Patient Safety, Clinical Application of AI and related academic and industry collaborative research.
