
[JJ] Evening Poster | M (Multidisciplinary and Interdisciplinary) | M-GI General Geosciences, Information Geosciences & Simulations

[M-GI29]Introduction to Great Debate: Current status of open data & open science (for Japanese audience)

convener: Atsushi Higuchi (Center for Environmental Remote Sensing (CEReS), Chiba University, Japan),
Yasuhisa Kondo (Research Institute for Humanity and Nature)

Wed. May 23, 2018 5:15 PM - 6:30 PM Poster Hall (International Exhibition Hall7, Makuhari Messe)

Open Science is growing up as a new paradigm to accelerate scientific innovation. In addition to importance of open data in Geoscience, here we will overview current status and future perspectives of open data and science in and around Japan.

[MGI29-P01]Introduction to RDUF (Research Data Utilization Forum): an arena for international and local research data management

*Yasuhiro Murayama^{1,2} (1.Strategic Program Produce Office, National Institute of Information and Communications Technology, 2.Vice chair of RDUF (Research Data Utilization Forum))

Open Science and Research Data Sharing have been hot topics in international experts' discussions like in G8, OECD and AGU. Research Data Alliance (RDA) is the major arena for these topics and RDUF (Research Data Utilization Forum) has been set up inside Japan to make a local forum of Japanese experts and stakeholders. RDUF's individual membership is free of charge. We welcome your active participation in RDUF for research data discussions.
