## [O-06]The connection between earth sciences and society by Geoparks -Results and issues in the past decade-

convener:Noritaka Matsubara(Graduate School of Regional Resource Management, University of Hyogo),  
Yayoi ICHIHASHI(Sado City Board of Education), Hokuto Obara(Mine秋吉台ジオパーク推進協議会, 共同),  
Marekazu Ohno(Unzen Volcanic Area Geopark Promotion Office)

Sun. May 20, 2018 5:15 PM - 6:30 PM Poster Hall (International Exhibition Hall7, Makuhari Messe)

10 years have passed since the Geoparks started in Japan and it has grown as a channel for linking earth science and society. In this session, we would like to look back on our activities and discussions of the past decade, and discuss the feature of Japanese Geoparks.

## [O06-P23]Activity of San'in Kaigan UGGp

\*Suzuka Koriyama<sup>1</sup>, Yukihiro Mastuura<sup>1</sup> (1.San'in Kaigan Geopark Promotion Council)

The San'in Kaigan UGGp is a bounded area comprising the entire municipalities of Kyotango City in Kyoto Prefecture; Toyooka City, Kami Town, and Shin'onsen Town in Hyogo Prefecture; and Iwami Town in Tottori Prefecture; and the northern part of the municipality of Tottori City in Tottori Prefecture.

The San'in Kaigan UGGp provides territorial cohesion as an area featuring natural scenery with a wide variety of rocks, strata, coastal landforms, and inland waterfalls and gorges, which show the span of history from the times when the Japanese Archipelago was not yet separated from the Asian Continent, through the formation of the Japan Sea, to the present. The Geopark area has also been home to unique human lifestyles based on such natural features.
