1. Miyagi Prefectural Tagajo Senior High School

Miyagi Prefectural Tagajo High School opened the Department of Disaster Science in April, We are emphasizing more practical fieldwork without being satisfied with learning of only textbooks. For that reason, we have set up a Uraso survey (partner: Ocean Research and Development Organization) in the first year, a Kurikoma pilgrimage inspection (partner: Tohoku University Academic Resource Research Center) in the second year. In this report, we report on new efforts to educate disaster prevention in collaboration with research institutions / universities of our school and how we assembled field work.
