

The Histories of the Climate Change Studies in Japan (II)

*Jiro Tomari¹

1. Atmospheric and Oceanic Research Institute, University of Tokyo

In the last meeting, I contended that regular studies for global warming caused by greenhouse gass started in the early 1980' s in Japan.

In this meeting, I will talk about the reason why global cooling hypothesis had lost the influence and global warming had made a predominant hypothesis among atmospheric scientists in the early 1980' s.

Keywords: climate change, global warming, glpbal cooling
