

Verification of Origin of Kimber light pipe by Abduction with Multi-Impact Hypothesis^{2014 U06-P24}

-Demonstration of Spouring Mantle (including deep diamond rocks) Mechanism actual Proof of Plate Tectonics -

*Akira Taneko¹

1. SEED SCIENCE Lab.

The formation hypothesis of Kimberlite Pipe is the first original idea in the world.

- Formation Mechanism of Diamond is studied by Carbon Emission from deep part of Earth by the Kimberlite pipe, but Cause was unclear why Injection of Kimberlite pipe occurred.

In **Multi Impact Hypothesis**^{2014 U06-P24}, Mantle fragments of Planet CERRA collided with Earth and became Origin of Ocean Floor due to Mantle defect.

Collision Energy at Earth Collision arrives at Counter position of Earth at the same time, and Kimberlite Pipe gushes from the deep mantle.

Collision to Drake Passage position (**high latitude**) that formed Téchis Sea is a **moment** that tilts Axis about 23.5 degrees and Formation of a Kimberlite Pipe to Milneuil position,

Formation of Indian Ocean and Division of Gondwana Continent, Caused a major shift to all directions.

Caused it. Mmantle defect in Antarctic position, Antarctica moved there and there has not been any movement since then. Deccan Plateau And Australia **moved actively.**

In **Collision with the Hawaiian position in Pacific Ocean**, Kimberly Position in Africa before moving on Continent. **Premier mine** of 1.75 million years ago is moving with mine by Continental Migration. Shock waves to the other side of Earth, mantle and A diamond mine was formed with Ejection of Impact jet that breaks through the crust.

Thus, *from Multi Impact Hypothesis*, Origin of Diamond could also be verified by Abduction.

- SEED SCIENCE Labo, the smallest scientific Personal institute in the world The object of exploration is the world's widest and the past [the origin of the solar system and moon and the earth, the universe does not expand etc.]

Keywords: All collision energy concentrates at the same time at Counter position, Origin of deep ocean bottom with isostasy due to mantle defect, Collision to high latitude is the couple of the earth's axis tilt, Collision to Hawaii is the origin of the Kimberley mine before the continental movement, Abduction is a verification using multiple results of one-time evolution, the multi impact hypothesis

P1-20 The unified manner to clarify the Missing Link of the Earth and the Moon,
Multi-Impact Hypothesis^[1] by the very unique Idea.

7. ゴンドワナ大陸の亀裂形成とキンバーライト・パイプの成因と分布
ハワイ位置衝突⇒プレミア鉱山, ドレイク海峡位置衝突⇒ミルーヌイ鉱山
高緯度への衝突⇒地球自転軸の23.5° 傾斜の起源となる.

原因:

裏面Mantle隕石衝突

衝撃波集中⇒圧力

衝撃力=パイプ形成

亀裂: ●17.5億年前

移動: ○約1億年前

衝撃波=パイプ形成
