1. Atmosphere and Ocean Research Institute The University of Tokyo

The Hydrospheric Atmospheric Science Section, as one of the five sections of JpGU, has started a revision of the Dream Roadmap 2014. Inputs from JpGU members, research institutions and societies covering oceanographic, atmospheric, and hydrospheric sciences have been and will be properly included for the production of a new Roadmap.

Concrete steps for the update are as follows:

- 1) Thorough checks of what should be added to, and removed from the Roadmap 2014.
- 2) Future direction of the oceanographic, atmospheric, and hydrospheric sciences should be clearly shown as a new roadmap for the coming 15 to 20 years, accompanied with future dreams for more than 20 years ahead.
- 3) Important keywords for large-scale projects whose proposals are now preparing in research societies, institutes and universities should be properly included.

This presentation will be a kick-off report on a new roadmap of the Hydrospheric Atmospheric Science Section.
