The Society of Geomagnetism and Earth, Planetary and Space Sciences (SGEPSS) future survey working group has been established since 2017 with the goal of surveying and summarizing the current status and future vision of the geomagnetism and earth, planetary and space sciences. The working group, organized by members from SGEPPS subgroups, SGEPPS related committees for international collaboration, and the SGEPPS steering committee, has been summarizing discussion and information provided from the society members. In this presentation, we briefly outline the document of the current status and future vision, and introduce the working group activities.
