We would like to report the utilization of SNS in the North Ibaraki Geopark Plan after canceling the certification for the member of Japan Geopark Network(JGN). Toward recertification, strict opinions have been exchanged in the private Facebook about the North-Ibaraki Geopark and the geoparks in Japan. The whole concept of the geopark in Japan will be also argued based on the results of those discussions.

Keywords: SNS, North Ibaraki Geopark, Japan Geopark Network
