1. Minami-Alps MTL area Geopark Council

In order to know and enjoy the Geopark more deeply, it is effective to listen to the story of the guide by actually looking at the site. However, I think that people who do not know Geopark suddenly participate in geotour etc. are high hurdles.

So, at the Minami-Alps Geopark, we developed a program that allows you to feel free to participate as a catalyst for getting to know the Geopark. And we have been using it in workshop at community center and events. We are also discussing prior learning of educational tour intended for elementary school students' and utilization as rainy day program.

In this presentation, we introduce the mainly about newly developed program and the situation of the use.
