Game-change of scholarly communication based on papers and the role of learned society and peer-review

*Kazuhiro Hayashi\textsuperscript{1}

1. National Institute of Science and Technology Policy

Author reviews current topics of game-changing in scholarly communication based on papers and discuss the significance of learned society and peer review. Both couldn't stay as they are, but still have potential to keep scholarly communication healthier, resulting in transformation of scholarly society to the new research paradigm.
