

## The proposal about use in the disaster prevention education by the virtual space using a IN-YO-ZU Map.

\*Masahiko Konomatsu<sup>1</sup>

1. Faculty of Education, Wakayama University

It is due to request from morning-sun navigation incorporated company the picture of 3D virtual space which used VR based on the IN-YO-ZU map, to create it recently, and to use it also for disaster prevention education. So, in this research, I was with the virtual space using a IN-YO-ZU map, and the child and the student inquired so that recognition might become possible easily about the difference between the topographical map of the Geographical Survey Institute, a geologic map, a satellite photograph, etc.

Keywords: Fine geographical feature analysis, IN-YO-ZU map, disaster prevention education
