1. School of Regional Resource Management, Graduate School, University of Hyogo, 2. Toyo Univ., 3. Teikyo Heisei Univ.

We conducted a virtual geotours using a GigaPan image and live broadcasting. The students could make observations through the web site. Outreach activities for students utilizing the high-resolution images and live broadcasting will be able to teach students in distance areas geological field work skills.

Keywords: GigaPan, geology, Anden geosite, Ikuta Ryokuchi Park, lower secondary school student, upper secondary school students
