[S-CG46]Hard-Rock Drilling Science: From Continental to Deep Sea Drilling, and Oman Project

Tue. May 24, 2022 5:15 PM - 6:45 PM Exhibition Hall 8

The IODP and ICDP drilling expeditions including Oman Drilling Project have drilled numerous hard-rock cores of ancient oceanic lithosphere and the underlying subduction zone. In this session, we invite presentations on the scientific results of Hard-Rock drilling. We also invite related studies of on-land geological investigations of ophiolites and experimental studies. The session is intended to be interdisciplinary, including the fields of geophysics, geochemistry, petrology, engineering, and biology. Co-sponsored by Hard Rock Drilling Science Focus Group.

5:15 PM - 6:45 PM
