President of the European Society of Intensive Care Medicine (ESICM) 2016-2018

Scientific fields of interest and research: Noninvasive Ventilation, Mechanical Ventilation, ARDS, Shock, sepsis and infections.

Involved as Principal Investigator in many phase II-III clinical and international trials in ICU patients

Author of more than 300 papers with more than 24,384 citations, H index 74. The majority of these scientific publications are on several aspects of Noninvasive Ventilation, ARDS, Shock and sepsis.

Invited lecturer or chairman in more than 300 International Meetings.

The 50 year from the diagnosis of ARDS and the evolution of the concepts and therapies will be reported and analysed.

Since first identification to the present time there was an incredible evolution of mechanical ventilation and supportive techniques with some improvement of the mortality rate.

The therapies are now allocated in specific time windows and timing of interventions, rendering more sophisticated and effective our approach as physician to this difficult syndrome.
