

Symposium

[S35]Understanding the mechanism of inflammation for drug discovery

Organizers: Yasuo Yoshioka (RIMD, Osaka Univ), Jun Kunisawa (NIBIOHN)

Fri. Mar 27, 2020 3:00 PM - 5:00 PM [Room W] Annex Hall 2 (1F)

In this symposium, we will discuss about 1) identifying the cell surface receptor of oligonucleotides as adjuvants, 2) functional diversity of disorder specific-macrophage, 3) a therapeutic strategy for fibrosis focusing on myofibroblasts, 4) epigenetic regulation in severe influenza virus infection, 5) immune regulation by intracellular symbiotic bacteria. We believe that these presentation will provide information for the development of novel therapeutic strategy against inflammatory disorders.

3:00 PM - 3:05 PM

[S35-Opening]挨拶

吉岡 靖雄¹ (1. 阪大微研)
